hello@winelements.com · winelements.com

U.S. Patent No. 10,980,324 (and Future Patents) · TIPS-Awarded Vendor

SOLE-SOURCE JUSTIFICATION LETTER

The Patented Safe Pouch® System — U.S. Patent No. 10,980,324 and Future Patents

Date: 5/25/2026

Issued to: K-12 School Districts and Educational Institutions

Attn: Procurement Officers and Business Managers

To Whom It May Concern:

This letter confirms that **Win Elements LLC** is the **exclusive vendor** of the patented Safe Pouch® system, protected under **U.S. Patent No. 10,980,324** and any additional patents subsequently granted to Win Elements LLC for the Safe Pouch system or its components. This documentation is provided to support sole-source procurement justification for any school district or educational institution adopting any current or future product within the Safe Pouch system.

1. One Patented System. Multiple Product Tiers.

The Safe Pouch® system encompasses every product within the Win Elements LLC family, including:

- **Safe Pouch Blue** — Standard daily-use pouch for the general student population
- **Safe Pouch Orange** — Tier 2 administrative pouch for behavioral intervention
- **PouchBook** — Student-personalized pouch for individual ownership programs
- **Safe Pouch Pro** — Rigid translucent premium tier for high-tamper environments and accessory storage

All products operate under the same patented architecture, the same magnetic authorization tiers (Home, Teacher, Administrator), and the same operational procedures. A single sole-source justification covers every product in the system — including future tiers, accessories, and any new products released by Win Elements LLC under U.S. Patent No. 10,980,324 or under additional patents subsequently granted for the Safe Pouch system.

2. Sole-Source Justification

No alternative product can legally provide the specific combination of features protected under U.S. Patent No. 10,980,324 and the additional patents that may be granted to Win Elements LLC for the Safe Pouch system. The patented Safe Pouch system delivers capabilities exclusive to Win Elements LLC, including:

- **Multi-tier mechanical locking with tier-restricted magnetic authorization** — Each pouch locks mechanically and releases only when a magnet with sufficient strength and the correct pattern is applied. Home, Teacher, and Administrator authorization levels each require a specific tier-restricted magnet.

- **Swappable lock architecture** — Any pouch can be reconfigured between tiers by swapping the lock alone, without replacing the pouch itself.
- **Integrated safety system** — Combines decentralized unlock (eliminates central-station bottlenecks), emergency cut-access (instant release during emergencies without a magnet), and signal-friendly fabric (medical devices and emergency alerts function while locked) in a single patented system.
- **Proactive replacement model** — Replacement parts shipped with every order, allowing schools to repair pouches the same day damage occurs. No warranty claim required. No shipping delays. No pouches out of circulation.

For school districts requiring these specific capabilities — particularly decentralized teacher-managed unlock, multi-tier behavioral escalation, integrated emergency cut-access safety, and proactive replacement support — Win Elements LLC is the only available vendor.

3. Forward-Compatible Investment Protection

The Safe Pouch system is designed as a forward-compatible architecture. As Win Elements LLC introduces new products, tiers, and capabilities — protected under U.S. Patent No. 10,980,324 and additional patents subsequently granted — existing district investments remain fully functional. Schools adopting Safe Pouch are not committing to a single product that may become obsolete. They are adopting a patented system designed to grow without forcing replacement cycles.

Districts adopting Safe Pouch today benefit from:

- **Consistent patented architecture** across every current and future product, so operational procedures remain stable as the system expands
- **Compatible magnetic authorization** across product tiers, so authorized magnets purchased today continue to function with future tiers
- **Reusable training and implementation knowledge**, so staff do not need to relearn the system when new tiers or accessories are added
- **No rip-and-replace upgrade cycles**, because new products extend the existing system rather than replacing it
- **Continued sole-source procurement eligibility**, because all current and future tiers fall under U.S. Patent No. 10,980,324 and additional patents subsequently granted to Win Elements LLC

This forward-compatible architecture is a deliberate design principle of the patented Safe Pouch system. Schools selecting Safe Pouch today are protecting their investment against the obsolescence cycles common to other school technology purchases.

4. Vendor Information

Legal Name	Win Elements LLC
Business Address	31500 Grape Street, Suite 3-357, Lake Elsinore, CA 92532
Patent	U.S. Patent No. 10,980,324 and additional patents subsequently granted
Products Covered	Safe Pouch Blue, Safe Pouch Orange, PouchBook, Safe Pouch Pro, and all future products within the patented system
TIPS Contract	250802
Federal EIN	<i>Federal EIN: Provided upon request with W-9 form</i>

Email	hello@winelements.com
Phone	<i>Provided upon request with W-9 form</i>
Website	winelements.com

5. Verification

Patent verification is available through the United States Patent and Trademark Office:

Visit [uspto.gov](https://www.uspto.gov) and search **U.S. Patent No. 10,980,324** for the complete patent documentation. Additional patents subsequently granted to Win Elements LLC for the Safe Pouch system can be verified by searching the assignee name **Win Elements LLC** on the USPTO database.

TIPS contract verification:

Visit tips-usa.com and search for vendor **Win Elements LLC** for TIPS contract documentation.

6. Authorization for Procurement Use

This letter is provided for the purpose of supporting sole-source procurement documentation for school districts and educational institutions adopting the Safe Pouch system. Win Elements LLC authorizes recipients to include this letter in their procurement records, board agenda materials, and any internal documentation required to justify sole-source purchase of any Safe Pouch system product — including Safe Pouch Blue, Safe Pouch Orange, PouchBook, Safe Pouch Pro, and any future product released under U.S. Patent No. 10,980,324 or additional patents subsequently granted to Win Elements LLC.

Educational institutions requiring a district-specific version of this letter addressed directly to their procurement office may request one by emailing hello@winelements.com with the subject line "District-Specific Sole-Source Letter Request." District-specific letters are typically issued within 24 hours of request.

7. Additional Documentation Available

Win Elements LLC provides the following procurement-ready documentation upon request:

- W-9 form
- U.S. Patent No. 10,980,324 verification documentation
- Verification of additional patents granted to Win Elements LLC for the Safe Pouch system
- TIPS contract documentation
- Insurance certificates
- Product specifications and warranty terms (for all products in the system)
- Volume pricing schedules
- References from existing school customers
- District-specific sole-source letter (customized version of this document addressed to your specific district)

To request additional documentation, contact:

John Nguyen, Founder, Win Elements LLC

Email: hello@winelements.com

Subject line: *Procurement Documentation Request*

Sincerely,

John Nguyen
